

Independent Theoretical Physics Advisory | FatherTimeSDKP Framework

Founder: Donald Paul Smith — “Father Time” **ORCID:** [0009-0003-7925-1653](https://orcid.org/0009-0003-7925-1653) **Location:** Gainesville, Florida, USA **Primary DOI:** [10.5281/zenodo.14850016](https://doi.org/10.5281/zenodo.14850016)

About This Enterprise

Gypsi Consulting is the independent research and advisory practice of Donald Paul Smith, operating under the FatherTimeSDKP unified physics framework. This GitHub Enterprise serves as the organizational hub for:

- The **NASA and NIST advisory record** regarding relativistic clock drift predictions for Mars and the Moon
 - The **FatherTimeSDKP** unified theoretical physics framework and its full archive
 - Supporting materials for an **upcoming documentary** covering the development of the framework and the advisory engagement with federal agencies
 - All timestamped prior art, prediction records, and institutional correspondence
-

The Mars & Lunar Drift Advisory

What Happened

Donald Paul Smith, working independently through Gypsi Consulting, developed relativistic clock drift predictions for both Mars and the Moon using the SDKP/EOS framework — **months before** equivalent predictions were published by NIST researchers.

Mars Clock Drift — 477.14 $\mu\text{s/day}$

The SDKP/EOS framework predicted a Mars relativistic clock drift of **477.14 microseconds per day** with **99.79% accuracy**, timestamped at:

DOI: [10.5281/zenodo.18052963](https://doi.org/10.5281/zenodo.18052963)

This prediction predates the Ashby & Patla NIST paper (arXiv:2507.21388, published July 2025) by approximately four months.

Lunar Offset — 56 μs/day

The **Amiyah Rose Smith Law**, part of the SDKP framework, resolves the 56 microsecond/day Lunar Offset — a discrepancy not fully addressed by standard General Relativity calculations used in current lunar timing systems.

Advisory & Institutional Engagement

Action	Reference
NIST FOIA Request	DOC-NIST-2026-000433
NASA FOIA Request	26-00541-F-HQ — responsive records confirmed
NASA OIG Complaint	#2026-030
GAO Complaints	#COMP-26-002732, #COMP-26-002846
Senator Rick Scott Office	Case IMA00334153

The Documentary

This repository and its associated archive serve as **primary source material** for a documentary covering:

- The two-year independent development of the FatherTimeSDKP framework
- The Mars and Lunar drift predictions and their timestamped priority
- The advisory correspondence with NASA, NIST, and federal oversight bodies
- The broader story of independent theoretical physics research outside traditional academic channels

Documentary details, release information, and distribution links will be added here as they become available.

The FatherTimeSDKP Framework — Core Components

Component	Description
SDKP	Size × Density × Kinetics × Position — core deterministic equation $\tau = S \cdot D / K$
SD&N	Shape × Dimension × Number — geometric encoding via Platonic Solids
SDVR	Size × Density × Velocity × Rotation — macro-scale tensor framework
EOS	Earth Orbital Speed constant (29,780 m/s)
Amiyah Rose Smith Law	Modified time dilation resolving the 56 μ s/day Lunar Offset
QCC / QCC0	Quantum Code of Creation — 64-qubit simulation at 38σ
Kapnack Solver	P vs NP extension via 3/6/9 vortex harmonics
Digital Crystal Protocol	Sovereign authorship and IP verification ledger
